

PIGS

PREMIXES

AGROMEDICA LTD

Produces standard or custom made premixes and feed supplements for the compound feed industry.

Premixes of vitamins and essential micro-elements needed to compose balanced animal feed.

Feed Supplements consisting of vitamins, essential micro-elements, macro-minerals, amino-acids and other feed additives.

NUCKLOSPRAY YOGURT

A **Milk replacer for piglets**. Yogurt can be used in all cases, where the milk production of the sow is insufficient. Low feed intake due to stress, illness or high environmental temperatures decreases the amount of sow milk available per piglet.

NUCKLOSPRAY K34

Milk Replacer: A dairy based feed ingredient. It consists of high quality dairy ingredients and homogenized vegetable fats. All the ingredients are selected and combined to meet the optimal nutritional demands of a young piglet.

TIAM – OXI

Premix of **Tiamulin** and **OTC** for use in the feed as antibiotic against Mycoplasmosis, respiratory diseases, intestinal diseases and other inflammations as arthritis.

PROFISH Ω SWINE

Profish is intended for feed mills and farms which appreciate the benefits of fishmeal but gladly do without the quality concerns of fishmeal. It contains high quality salmon oil, an optimized amino acid profile for swine and all proteins are from the best quality vegetable origin.

KANTERS ACID Ca/P

Optimum **Calcium** and **Phosphorus** mix with **Choline Chloride** and **Organic Acids** in liquid form. Improves protein digestion and FCR.
